

TEVIN MALLYA

SOFTWARE DEVELOPER | AI/ML | FULL-STACK DEVELOPMENT

+255 724 371 347 | mallyatevin@gmail.com | github.com/Tevinpeter | tevinmallya.netlify.app

PROFESSIONAL SUMMARY

Computer Engineering graduate and software developer with hands-on full-stack development using JavaScript, React, Node.js, Python, SQL, REST APIs and databases. Brings 2+ years of production troubleshooting experience across APIs, webhooks, JSON, OAuth and SaaS integrations. Strong focus on Artificial Intelligence, Machine Learning and Neural Networks, with Dart/Flutter for mobile application work.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, Dart

Development: React, Node.js, Express.js, HTML/CSS, Flutter, REST APIs

AI & Data: Machine Learning, Neural Networks, regression/classification, CNN foundations, data analysis

Databases & Tools: MySQL, PostgreSQL, MongoDB, Redis, Git/GitHub, Postman, JSON, Webhooks, OAuth, log analysis

TECHNICAL PROJECTS

KIBALITI - Corporate Travel Booking Platform | Full-stack

- Built a React/Node.js/Express/MongoDB platform integrating third-party REST APIs for real-time flight and hotel data, including request tracing, response validation and error handling.

Student Record Management Database | SQL

- Designed a normalized MySQL database with 20+ tables, foreign keys, many-to-many relationships, stored procedures and reporting views.

Machine Learning & AI - Independent Development | Python / ML

- Building practical ML foundations through regression/classification experiments, neural-network fundamentals and CNN work, supported by Computer Engineering coursework.

PROFESSIONAL EXPERIENCE

Technical Support Engineer - Tier 2/3 | Monday.com Support Operations

May 2025 - Jul 2026

Warsaw, Poland

- Diagnosed production failures across REST APIs, webhooks, JSON payloads, custom integrations and complex platform configurations, tracing request/data flows to root causes.
- Owned complex investigations end-to-end, resolving ~90% of escalated cases independently without L3 Engineering involvement; managed P0/P1 incidents and coached Tier 1/new hires on technical troubleshooting.

Technical Support Specialist - Tier 1/2 | Square Online & Weebly Support Operations

Apr 2024 - May 2025

Warsaw, Poland

- Troubleshoot production web/e-commerce systems across DNS, SSL, REST API connectivity, webhooks and third-party integrations while handling 100+ daily technical queries.
- Reproduced integration failures, documented findings and collaborated with engineering/product teams on bug reports and workflow improvements.

EDUCATION

BSc Computer Engineering | Vistula University, Warsaw, Poland | Graduated July 2025

Relevant focus: Artificial Intelligence, Machine Learning, Neural Networks, Data Structures & Algorithms, Software Engineering, Cloud Computing and Computer Networks.
